

CDFHS and WEEE

"The WEEE Directive is European environmental legislation. It aims to address the environmental impacts of WEEE, and to encourage its separate collection, and subsequent treatment, re-use, recovery, recycling and environmentally sound disposal." Quote AVC Weeeco

CDFHS is well known as a recycler and re-user of household goods. Lesser well known is our commitment to dealing with current UK and European legislation in respect of Waste Electrical Products – WEEE.

By law companies and individuals have a responsibility for its safe disposal. In cooperation with AVC Weeeco in 2012 CDFHS set to acquiring some of the key Environmental accreditation to assist in our developing this activity. This is in common with our objects. Ewe will be developing this as additional work experience opportunities and its obvious synergies in bringing electrical items to CDFHS which we may be able to salvage and add to our support to the disadvantage or as revenue from the WEEE directive / compliance schemes

We list our current certification.

Operations in respect of WEEE are on hold due the fire damage to Unit 18 as soon as practicably possible we will be operating as a Dedicated Collection Facility. We also envisage looking for additional Environment Agency Accreditation. We will become an Authorised Approved Treatment Facility.

Environmental:	Certification and documentation – detailed following documents available for inspection as required.
Licensed Carrier:	The Hazardous Waste (England and Wales) Regulations 2005 licensed Carrier no ROCAEXECOUNTYDFHS/08/07/2008
Premises Code	NUK346
DCF - S2	The Environmental Permitting (England and Wales) Regulations 2010: Exemption Ref EPR/KE5795RY/A001
Waste Exemption T11	Confirmation of Exemption: The Environmental Permitting (England and Wales) Regulations 2010: Ref NCC/059634/2012
